

Report of the IHSS2021 conference for Talent Support Council of ELTE University

Gorkhmaz Abbaszade

Doctoral School of Environmental Sciences

I am Gorkhmaz Abbaszade, a PhD student, working on urban geochemistry and microbiological research projects. I have participated at the XVII Italian Hungarian Symposium on spectrochemistry (IHSS2021), which was held online, with the support of Talent council. The conference is having a great tradition and is held each second year in Hungary or Italy. It is one of the well-known and interested conferences where a lot of people join from various countries to share their knowledge and learn new idea, recent inventions. The conference was held between 14-18 June, and was very diverse regarding sessions, The role of analytical chemistry in environmental protection, Emerging challenges in environmental contamination, Emerging challenges in environmental contamination, Contaminants and residues in food, Current developments in medical devices, New challenges in pharmacology and medicine, etc. I had opportunities to join wide scientific presentations and learn new techniques, advances.

Results of ICP-MS analysis for Pb, Cd, Hg and As

XVII Italian-Hungarian Symposium on Spectrochemistry

A slide from my presentation at the IHSS2021 online conference

The oral presentations were allowed to be presented in 15 minutes which followed by 5 minutes questioning session. The audience was a lot interested in my research which mainly was covering environmental health and protection. I had opportunities to meet new people/scientists

and discuss deeply about their research interest and results. The conference also gave me an opportunity to meet Professor and students from highly ranked Universities with the similar research topics and interests, that we introduced with each other our doctoral research topics and current scientific challenges.

Budapest, 28.06.2021
