

Post-Conference Report

To

Talent Support Council of Eötvös Loránd University

My name is Teshome Bayleyegn. I am a 3rd-year Ph.D. student at the Eötvös Loránd University (ELTE) in Budapest, Hungary. I attended the 13th International Conference on "Large-Scale Scientific Computations" from June 7 to 11, 2021, in Sozopol, Bulgaria via the Zoom platform. The conference was very attractive and meaningful in many ways.

It was a wonderful time to have such an opportunity to participate in this international conference. Many scientists, researchers, and students from abroad participated in this conference and shared their research findings.

The five-day conference consisted of 3 plenary sessions, with 1-3 speakers per session. Each speaker was given 45 minutes, and in Hall A, B, and C, there were 12 parallel sessions with 2-5 speakers per session, each giving 25 minutes, including discussions.

To motivate participants to embrace creative experiences and to foster discussion and strengthen connections between experts, a wide range of experts, researchers, educators chaired and spoke in the conference and plenary sessions where they presented and discussed their findings accompanied with an interesting questioning-and-answering session.

Many Ph.D. students from abroad presented their research results in different sessions. I was one of them and had a talk on June 9, Wednesday 2021 at 10:45 – 11:10 with the title "On the Consistency Order of Runge–Kutta Methods Combined with Active Richardson Extrapolation" and we got nice feedbacks, comments, suggestions, and remarks on our talk. This has been very important and helpful to develop a scientific paper, new effort, and experience.

For this successful participation in this conference, the following personalities and institutions played their own role. First of all, I would like to thank my supervisor Dr. Ágnes Havasi for her unlimited constructive suggestions, scientific assistance, corrections, and encouragement. Secondly, I want to thank our co-author professor Istvan Farago for his indefatigable efforts, scientific advice, and valuable as well as constructive suggestions. Thirdly, a big thanks to the Talent Support Council of Eötvös Loránd University, for their financial support and contribution. This is inspiring students to participate in such academic events and has helped me to form an important communication with different professors and researchers.

Finally, I would like to thank all the organizing members for such a good conference. I have had many experiences and really it was an enjoyable event. I am really looking forward to experiencing and participating in the next conference.

Budapest, 2021.06.22.
