

## Report of the 16<sup>th</sup> of Carpathian Basin Conference for Environmental Sciences for Talent Support Council at ELTE University

Davaakhuu Tserendorj

Doctoral school of Environmental Science

I am Davaakhuu Tserendorj, 3<sup>rd</sup> year Ph.D. student, working on Urban geochemistry research project at Lithosphere Fluid Research lab (LRG), ELTE.

Recently, I attended KMKT - 2021 conference (Online), Budapest, Hungary with a support of Talent council. The aim of conference is to present the latest results of Environmental research in the Carpathian Basin and to discuss theoretical and practical problems. Also, provide an opportunity for initiating cooperation in international research activities and learning.

The conference was gather online held between 30<sup>th</sup> of March to 1<sup>st</sup> of April.

Accordingly, I presented an oral presentation in Environmental Science and Studies in English, titled 'A study of Natural radionuclides in attic dust and urban soil samples around coal-fire power plant from Salgótarján, Hungary'.

Here is link for the abstract book: <https://kmkt2020.elte.hu/index.php/en/abstract-book>

|                                                                                                                                                                                                                                                                      |    |

Here this is the conference package:

Therefore, during the conference, among the master and Ph. D. students presented research field and other aspects were evaluated by committee members and I was awarded 'Special award' from MS ENERGY Solutions Ltd. Here Award is attached.

## SPECIAL AWARD

**Davaakhuu Tserendorj**

given for oral presentation  
at the 16<sup>th</sup> Carpathian Basin Conference for Environmental Sciences.  
The award is kindly donated by MS Energy Solutions Ltd.

MS Energy Solutions Kft.

*Dr. Angyal Zsuzsanna*

Zsuzsanna Angyal  
ELTE TTK Centre for Environmental Sciences

Eötvös Loránd University  
30<sup>th</sup> March - 1<sup>st</sup> April 2021

Additionally, two of my colleagues were presented their research results, there I was a co-author, linked following can download Abstract book:
